Methodology

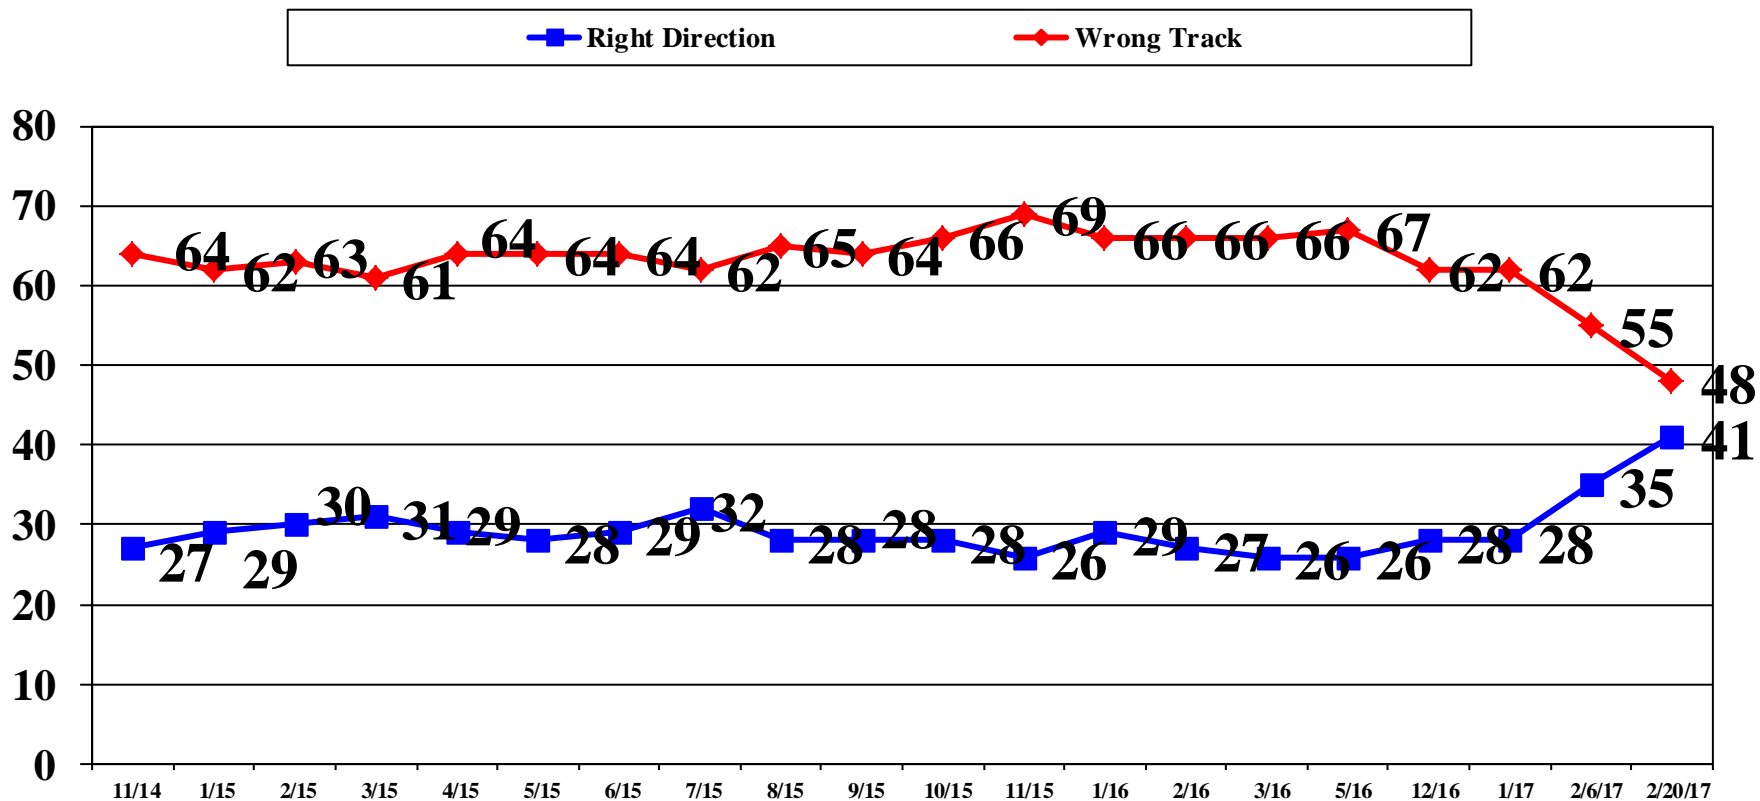

This survey of 1,000 likely general election voters nationwide was conducted on February 15th to 20th, 2017.

All interviews were conducted online; survey invitations were distributed randomly within predetermined geographic units. These units were structured to correlate with actual voter turnout in a nationwide general election.

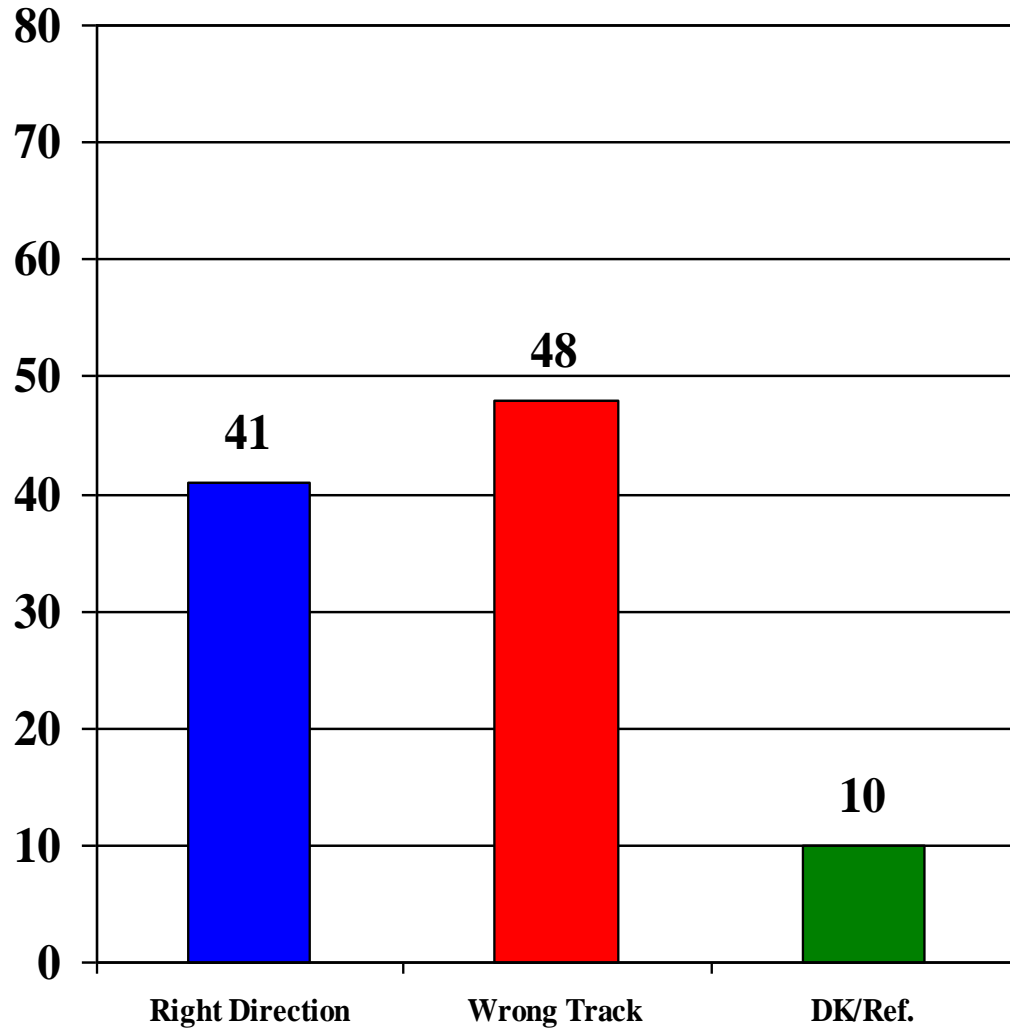

This poll of 1,000 likely general election voters has an accuracy of +/- 3.1% at a 95% confidence interval. The error margin increases for cross-tabulations.
