**National Survey:
Anti-Semitism
In America**

**Presented By:
John McLaughlin

June 2019**

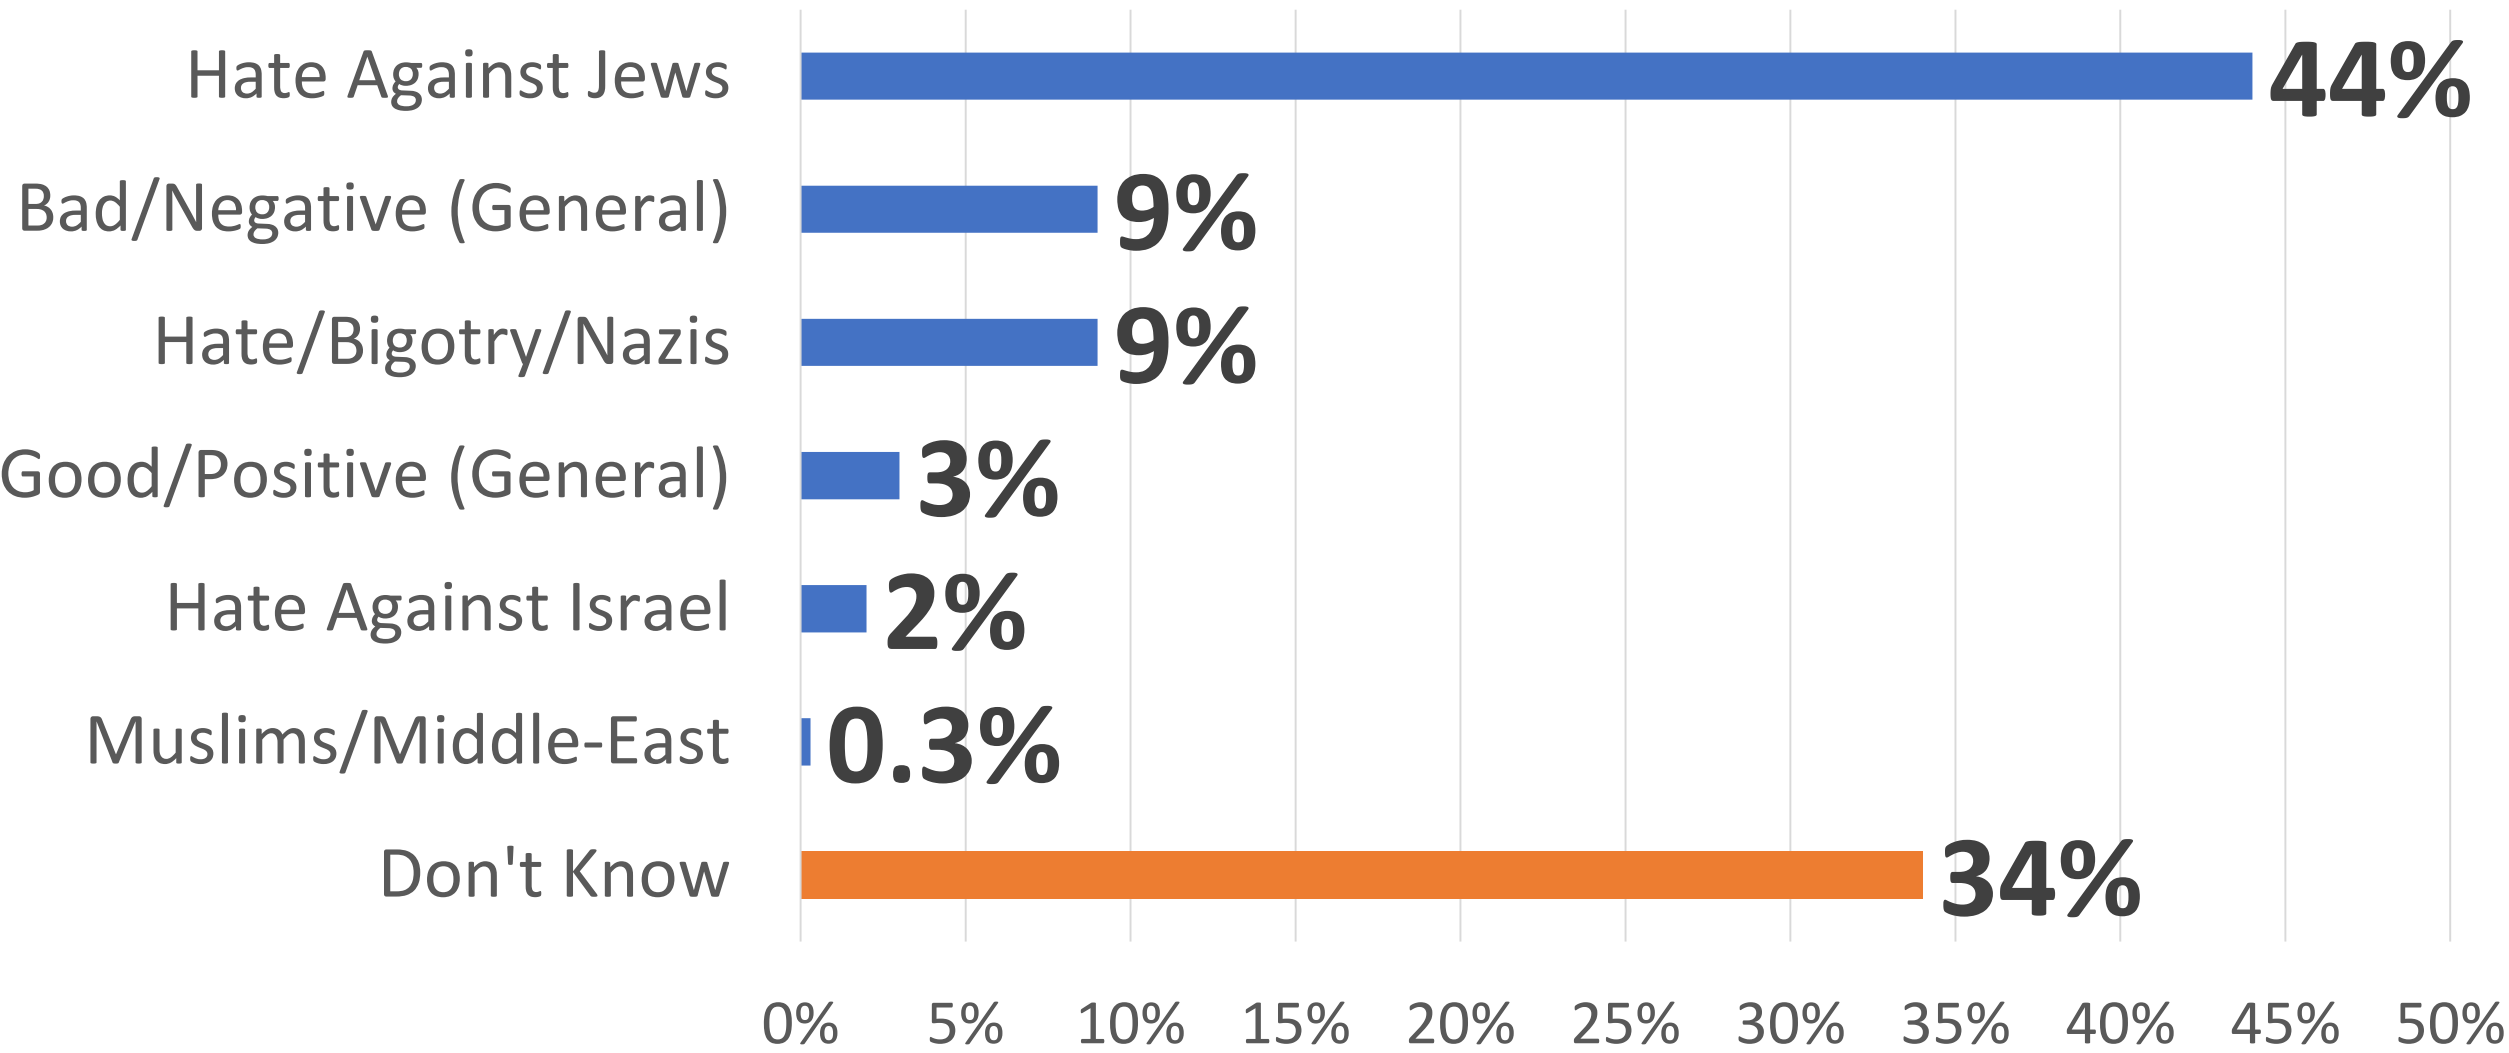

Methodology

This national survey was conducted among 1,000 likely 2020 general election voters. All interviews were conducted between May 13-16, 2019. The survey was conducted online and invitations were distributed randomly within predetermined geographic units.

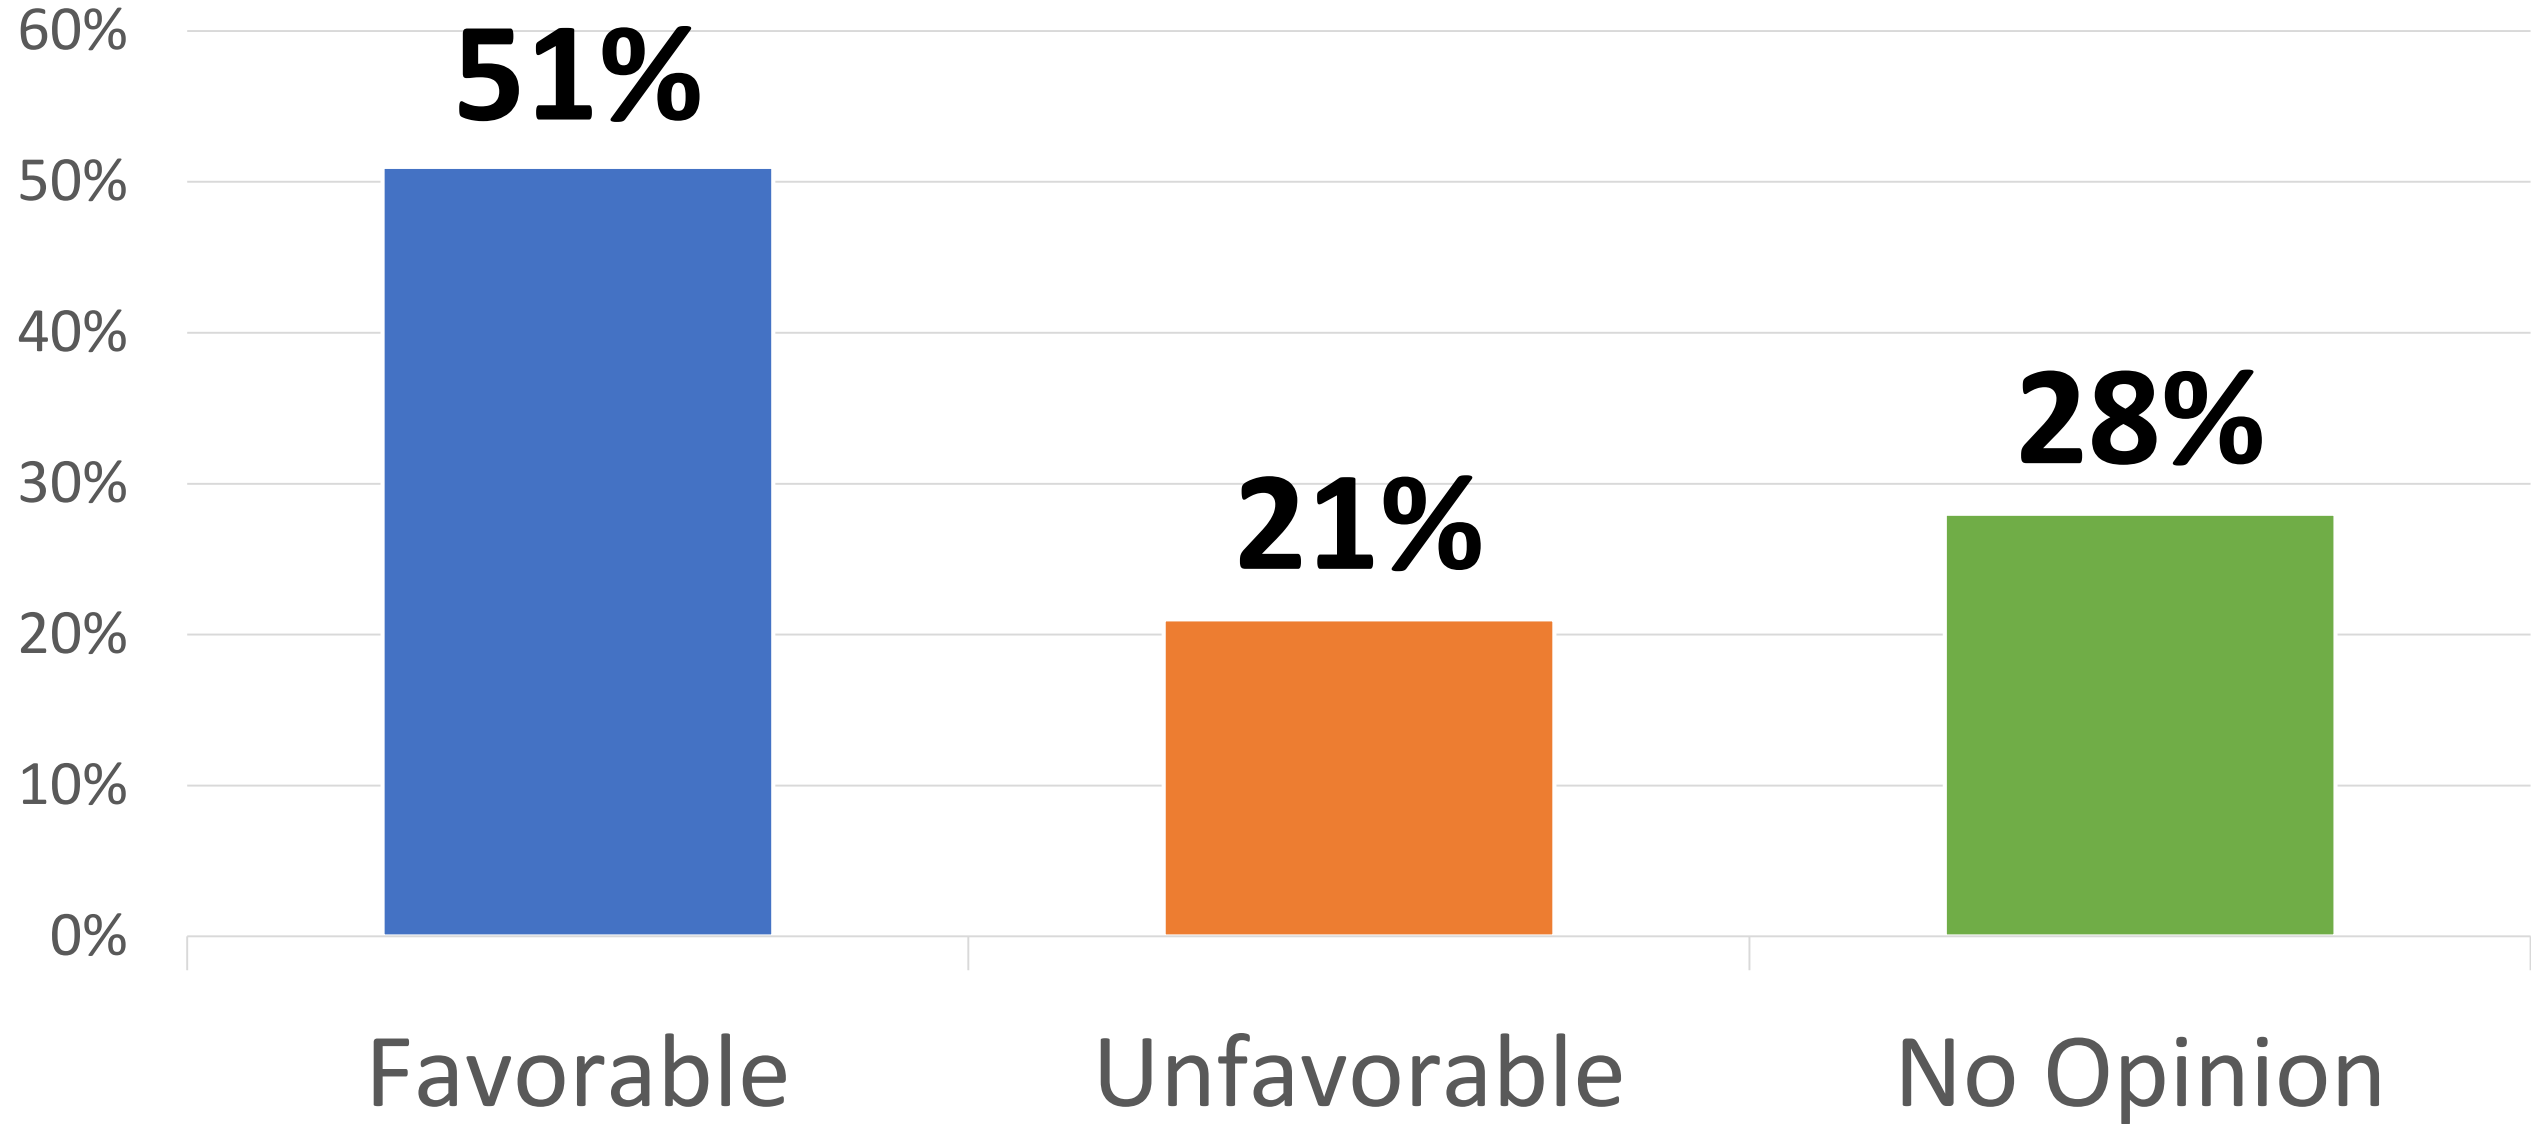

These units were structured to correlate with actual voter turnout nationwide in a general election. The sample of 1,000 likely general election voters has an accuracy of $\pm 3.1\%$ at a 95% confidence interval. The numbers in this presentation have been rounded and may not equal 100%.
