

Lawrence Kadish Poll

National Poll
Likely General Election Voters

Conducted By:
Lawrence Kadish
McLaughlin & Associates
February 2025

Methodology

Lawrence Kadish partnered with McLaughlin & Associates to conduct a national survey among 1,000 likely general election voters. All interviews were conducted online between February 13-19, 2025.

Online survey invitations were distributed randomly within predetermined geographic units. These geographic units and voter demographics were structured to reflect a presidential general election electorate.

The sample of 1,000 likely voters has an accuracy of +/- 3.1% at a 95% confidence interval. Survey results in this presentation have been rounded and may not equal 100%.

Party:		Gender:		Education:	
Republican	37%	Male	48%	Non-Bachelor's	60%
Democratic	33%	Female	52%	Bachelor's/PG	40%

Given its potential to increase energy and electricity production and access throughout the world, securing fusion technology is a goal the Chinese are actively pursuing. China has committed approximately \$150 billion to their fusion program through the year 2035 and are sharing their work with Russia. Should Washington commit similar research dollars to compete with the Chinese?
